

Techedu's Training Program

Java for beginners

OVERVIEW

Our mentors are thinking from students point of view.

The main goal of this course is to introduce enrolled candidates with the basic to intermediate knowledge of java programming and make them acquainted with skillset of reading lines of code written in Java.

Prerequisite for this Course: **Absolutely Nothing**

Why TechEdu ?

VS

Over Other Platforms

- Completely based on Students mentors which will help students to understand concepts in more friendly manner.
- Less fees
- Interactive classes instead of recordings
- Recordings of live sessions are available for those who missed live sessions
- Interactive doubt sessions

- Students are not that user friendly with mentors at this platform.
- High Fees
- Recorded classes with lack of interactive exposure
- They have Doubt forum which generally students don't use and their doubts remains unsolved.

Why to Join us ?

Interactive training sessions 5days/ week plus weekend doubt sessions

Hand on practice of programming concepts

Student friendly mentor support available throughout your training
